

FOR IMMEDIATE RELEASE

Solimar Systems to Showcase SOLitrack™—Document GPS at Print® 09 *New Solution Automates Tracking and Management for High Volume Print Centers*

SAN DIEGO, CA—July 27, 2009—Solimar Systems, Inc., a leading global provider of production printing and secure document delivery solutions, today announced a pre-release viewing of Solimar's newest solution, SOLitrack™. SOLitrack—Document GPS, along with Solimar's entire solution suite, will be on display during the Print® 09 Expo at Chicago's McCormick Place in booth #2647 from September 11-16, 2009.

SOLitrack is a database-driven output management system that uses a web-based interface to control, track, and manage print files. Uniquely designed to manage high volume transactional printing workflows, SOLitrack provides a number of features that simplify security, status tracking, and accounting in production data centers and distributed print environments.

"SOLitrack is a unique automated tracking system for high volume transactional print workflows," stated Mary Ann Rowan, Vice President of Sales and Marketing. "Print service providers and organizations with several printers need real-time status of their print workflows. SOLitrack provides this tracking information."

SOLitrack is designed for organizations that experience dynamic changes to production workflows and need to make real-time decisions and adjustments concerning available print devices, workloads and job priorities. In addition to flexible database-driven event status reporting, SOLitrack provides accounting data for bill-backs and job invoicing.

"SOLitrack helps organizations prioritize work to ensure project deadlines are met," added Rowan. "SOLitrack is ideal for service bureaus and print centers that are required to meet strict Service Level Agreements (SLAs) and specific customer deadlines," added Rowan. "In many cases, SOLitrack will help organizations reduce the risk of SLA violations and associated financial penalties."

Building on a history of successful technology development, SOLitrack demonstrates Solimar's continued commitment to delivering powerful output management solutions for its clients.

About Solimar Systems, Inc.

Founded in 1991, Solimar Systems, Inc. is a leading developer of enterprise output management solutions for digital document creation, production and distribution environments. Installed in thousands of sites around the world, including nearly 50% of the Fortune 100, Solimar solutions satisfy a wide range of customer requirements by combining integrated connectivity, data stream transforms, print optimizations, document re-engineering/repurposing and sophisticated print queue management with secure web-based document presentment, distribution and tracking. Experts in legacy and modern data streams, Solimar solutions provide essential infrastructure to organizations in a variety of industries including insurance, financial services, banking, pharmaceuticals, telecommunications, healthcare, government, education, retail, manufacturing, utilities, distribution and print service bureaus.
